

Phase Pacific - Company Profile

Phase Pacific specialise in the supply of products and services designed to keep your network working to its best performance and to ensure any applications deployed on this network are robust and free from vulnerabilities.

Phase Pacific have been supplying and supporting best in class Network Visibility, Network Software and Hardware Test and Network Security solutions since commencing operations in 2003.

Phase Pacific has offices in Sydney, Melbourne and Brisbane and services the Asia Pacific region.

Phase Pacific can -

- Deliver products and services to provide the best **Visibility** of what is happening on any IT or Telecom network; tools that monitor, analyse and optimise network performance.
- Deliver solutions to address the needs of the **DevOps** industry; tools to validate and improve the quality of software builds and tools to automate the testing processes.
- Accelerate testing cycles in test labs through **Automation** solutions.
- Deliver quality **Test Instruments** to accelerate the deployment of high-speed data services, and the deployment of new technologies such as IoT, and 5G.

Phase Pacific's staff has years of experience in delivering quality, high tech solutions in Australia and abroad. Our knowledge and understanding of the market and new evolving technologies uniquely positions us to understand how to address our customer's challenges. We can leverage relationships built up with our international suppliers and partners over many years of working in these areas and source the right solution for the job.
